

Variable Area Flowmeters VA Master

Proven measurement for gases, liquids and steam

- Cost-effective measuring system
- Indication on site without external power supply
- Measurement of even small gas and liquid flows
- Independent of electrical conductivity
- Versions approved for use in hazardous areas
- High reproducibility

Metal tube – Glass tube

The ABB product range includes both metal tube and glass tube instrument lines and is used in the widest variety of applications:

Measuring point

- High pressure and temperature
- Opaque fluids
- Steam applications
- Current and contact output
- HART communication
- Digital display

- Low-cost solution
- Visual fluid monitoring
- Extremely low pressure
- Clear, transparent fluid

Metal tube

Glass tube

The purgemeters of both product lines are available with a differential pressure regulator that balances pressure variations in the system and provides a constant flow rate. ABB flowmeters can easily handle very small measuring ranges, e.g. in labs, and high flow rates for rugged industrial applications.

Application examples in various industries

Analytical	Mixing, dosing, monitoring
Automotive	Test benches, lubricants, cooling water
Chemical & petrochemical	Dosing of dyes/additives, separation/lubrication
Glass	Flame control
Heating, ventilation, air conditioning	Ensure constant flow rate
Industrial furnace construction	Burner control
Lab	Sampling, separation
Agricultural	Spraying, e.g. fertilizers
Medical	Flow monitoring, anesthesia
Food and beverages	Aeration, homogeneous mixture
Oil and gas	Rinsing, tanks, boilers
Pulp & paper	Ensure constant flow rate
Pharmaceutical	Filling, injection
Water & waste water	Pump control

Overview metal tube devices

The well-proven, robust metal tube flowmeters are suitable for a wide range of applications. They have proved their worth for aggressive and opaque fluids or extremely demanding operating conditions. They are indispensable for applications requiring high pressure and temperature resistance.

Measuring point

- Flow rate 0.1...120.000 l/h (Qv) water or 0.008...3,600 m³/h (Qn) air (14.7 psia and 32 °F)
- Stainless steel primary
- Alarm contacts
- 4...20 mA output signal

Metal tube

2.5...120,000 l/h (Qv) water or 0.1...1,600 m³/h (Qn) air at 1.013 bar (a) and 0 °C (14.7 psia and 32 °F)

0.1...3,000 l/h (Qv) water or 0.008...90 m³/h (Qn) air at 1.013 bar (a) and 0 °C (14.7 psia and 32 °F)

FAM540

- Accuracy class 1.6
- HART communication
- Easy configuration
- Two-line graphical display
- Current and contact output

FAM3200

- Accuracy class 6
- Dosing
- Low-cost device
- Low installation costs
- Differential pressure regulation

Overview glass tube devices

These universal flowmeters are used in many industries for measuring and dosing liquids and gases. Due to the combination of various process-wetted materials they are suitable for even aggressive fluids.

Measuring point

- Flow rate 0.002...17.600 l/h (Qv) water or 4 cm³/min...520 m³/h (Qn) air at 1.013 bar (a) and 0 °C (14.7 psia and 32 °F)
- Visual fluid monitoring
- Alarm contacts

Glass tube

0.002...17,600 l/h (Qv) water or 4 cm³/min...520 m³/h air at 1.013 bar (a) and 0 °C (14.7 psia and 32 °F)

0.002...140 l/h (Qv) water or 4 cm³/min...4 m³/h air at 1.013 bar (a) and 0 °C (14.7 psia and 32 °F)

FAG1190

FAG6100

- Accuracy class 1.6
- Variety of process connections
- Measurement of more than 140 l/h water or 520 m³/h air

- Accuracy class 1.6...6
- Dosing
- Low-cost device
- Low installation costs
- Differential pressure regulation

VA Master FAM540

The FAM540 series is based on a modular system offering flowmeters with a simple indicator or including an advanced electronic transmitter. The combination of the various models with the different indicators provides suitable flow solutions for each application. The comfortable operation via the graphical display allows an simple adjustment to changing operating conditions.

Measuring ranges, water

DN	Minimum	Maximum	Unit
15 (1/2")	3...30	80...800	l/h
25 (1")	28...280	600...6000	l/h
50 (2")	0.4...4.2	2...24	m³/h
80 (3")	0.7...7.0	5...54	m³/h
100 (4")	2.5...25	10...120	m³/h

Measuring ranges, air 1 bar(a) 0 °C (14.7 psia and 32 °F)

15 (1/2")	0.1...1.2	2.5...25	m³/h
25 (1")	1.5...20	15...180	m³/h
50 (2")	10...125	60...720	m³/h
80 (3")	20...210	150...1550	m³/h

FAM540 gives the suitable view on the process for each application offering different indicator options:

- Analog indicator with or without alarm contacts
- Analog indicator with electronic transmitter with or without display

The display delivers outstanding advantages like the simultaneous indication of flow and counter, the user-friendly menu-driven operation in clear text, the configurable switching output as well as the self-testing functionality for the simplified commissioning.

All indicators have an excellent instrument read out because the needle's vibrations are substantially minimized.

Various application ranges

- Device designs ranging from simple to demanding applications
- Standard fluid temperature up to 400 °C (750 °F)
- Insulation up to flange diameter due to the unique decouple-proof magnetic follower system
- Flameproof enclosure or intrinsically safe to ATEX, FM, CSA, IEC Ex

Process safety

- 4...20 mA with integrated alarm function for min. and max. values
- Contact outputs according to Namur
- SIL2 certification for devices with alarm contacts
- Primaries conforming to NACE per MR-0175

Advantages of the Microprocessor Transmitter

- Convenient and intuitive operation with clear text configuration
- Medium properties can be changed at any time
- Configuration possible without opening the housing
- Automatic self-monitoring with error diagnosis
- Flow rate values are readable even in case of power failure

Technical Data

- **Power supply:** 10...46 V DC (Ex 10...28 V DC)
- **Current output:** 4...20 mA, load < 750 ohm
- **Digital output (Namur):**
 - Function selectable in the software
 - Alarm: Min, Max or Min-Max
 - Pulse output: fmax 100 Hz, 1...256 ms pulse width
- **Display:** High-contrast LCD with clear text configuration

FAM3200

This small variable area flowmeter with its all-metal design ensures that even under extreme conditions measuring the flow rate of gases and liquids is straightforward. Opaque fluids, which are primarily used in the chemical, petrochemical and pharmaceutical industries, are not a problem for this flowmeter.

Measuring ranges, water

Size	Minimum	Maximum	Unit
1/4"	0,1...1	10...100	l/h
3/8"	10...100	30...300	l/h
1/2"	40...400	80...800	l/h
1"	80...800	300...3000	l/h

Measuring ranges, air 1 bar(a) 0 °C (14.7 psia and 32 °F)

1/4"	8...48	500...3100	l/h
3/8"	500...3200	800...9200	l/h
1/2"	2000...12500	2000...24000	l/h

Device features

- Needle valves in the inlet or outlet
- Differential pressure regulator for constant mass flow
- Short installation length (only 90 mm)
- Measuring range up to 3000 l/h (H_2O)
- Choice of product-specific scale or neutral percentage scale

Sturdy Technology

- Process connections with NPT internal threads
- Horizontal or vertical process connections in 1/4" size
- Vertical process connections in 3/8"…1" sizes
- Decouple-proof and non-reactive magnetic follower system
- Robust design
- Standard pressure level PN100 with vertical process connections

Economic Use

When designing these devices, special attention was paid to flexibility and the capability to adapt to the prevalent operating conditions. The installation length of only 90 mm with horizontal connections allows for easy installation in confined spaces. The meter's sturdy all-metal design is easy to service and requires little maintenance.

- Cost-saving installation due to threaded connections; no expensive counter-flanges required
- Space-saving installation
- Robust design

FAG1190

This variable area flowmeter is a cost-effective and universal measuring instrument.

The process-wetted components are available in various materials. Due to the wide range of different float types and measuring tubes, these devices can be adapted easily to the prevalent operating conditions.

Measuring ranges, water

Size	Minimum	Maximum	Unit
1/4"	0.002...0.032	15...135	l/h
1/2"	4...43	45...419	l/h
3/4"	14...144	130...1300	l/h
1"	30...310	420...2800	l/h
1 1/2"	50...560	400...4800	l/h
2"	140...1420	3400...17000	l/h

Measuring ranges, air 1 bar(a) 0 °C (14.7 psia and 32 °F)

1/4"	0.2...3	400...4000	l/h
1/2"	2.4...21.2	30...180	l/min
3/4"	6...71	110...760	l/min
1"	12...154	460...2320	l/min
1 1/2"	30...370	1450...4600	l/min
2"	60...700	1700...8700	l/min

Device features

- Cost-effective measuring system
- Customer-specific flow units
- Visual fluid monitoring
- Thread and flange connection
- Optional alarm contacts for 1/2" and above
- Measuring tube and float can be replaced independently of each other
- Easy tube disassembly through O-ring seals

Technical Data

- Stainless steel housing
- Process-wetted parts made of 1.4571
- Maximum of two adjustable alarm contacts
- II 3 G T6 or II 3 D T85 °C...Tmed
- EEx nA IIC T6 (alarm only)
- Gasket variants conforming with FDA

FAG6100

The variable area flow meters of the FAG6100 series are designed for measuring, dosing and monitoring small liquid or gas flows. They are best suited for use as bubbling instruments for level and density measurement and for flushing differential pressure lines in the lab or in apparatus engineering.

Measuring ranges, water			
Size	Minimum	Maximum	Unit
1/16"*	2...32	80...1160	cm ³ /h
1/8"	0.02...0.26	0.8...8	l/h
1/4"	0.3...4.6	15...135	l/h

Measuring ranges, air 1 bar(a) 0 °C (14.7 psia and 32 °F)			
Size	Minimum	Maximum	Unit
1/16"*	0.2...3	3...41	l/h
1/8"	2...22	20...280	l/h
1/4"	15...225	400...4000	l/h

* only available as FAG6142 with 4" scale length

Device features

With the built-in needle valve the flow rate can be both adjusted and regulated. An attached differential pressure regulator in combination with the needle valve maintains the flow rate independently of any pressure variations. The optional limit contacts are essential components for monitoring the preset flow rate values. This is how processes can be controlled in an optimal way with a single device.

- Space-saving installation
- Visual fluid monitoring
- Easy to service snap-in design
- Alarm sensors for monitoring a preset measuring range (optional)
- Differential pressure regulator for constant fluid flow (optional)

Technical Data

- Robust housing made of Cr-Ni steel (IP 54)
- Indication on site
- Needle valves in the inlet or outlet, as required
- Optional alarm contacts for 1/8" and higher
- II 2GD c 135 °C (without alarm)
- II 2G c 135 °C (with alarm)

Material: 3.1, 3.2; test certificate / NACE															
Material confirmation with inspection certificate 3.1 to EN 10204														C2	
Material confirmation with inspection certificate 3.2 to EN 10204														C3	
Material confirmation NACE MR 01-75 with acceptance test certificate 3.1 to EN 10204														CN	
Material: 2.1; order conformity															
Certificate of compliance 2.1 to EN 10204 for order conformity														C4	
Certificates: 3.1; visual, dimensional, functional															
Acceptance test certificate 3.1 to EN 10204 for visual, dimensional, and functional checks														C6	
Certificates: 3.1; PMI test															
Acceptance test certificate 3.1 to EN 10204 for Positive Material Identification (PMI)														CA	
Certificates: 3.1; compression test															
Compression test to AD2000														CB	
Test package (compression test, non-destructive material test, welder test, welding procedure test)														CP	
Certificates: Calibration, test report															
Certificate of compliance 2.1 to EN 10204 with confirmation of accuracy														CM	
Calibration certificate with confirmation of accuracy and calibration data														CE	
Other user certificates															
Russia: Metrological and GOST R certificate														CG1	
Kazakhstan: Metrological and GOST K certificate (in preparation)														CG2	
Ukraine: Metrological certificate														CG3	
Belarus: Metrological certificate														CG6	
Additional Ex certificates and approvals															
Russia: GOST-Ex and RTN certificate														EG7	
Kazakhstan: Ex permission certificate (in preparation)														EG3	
Ukraine: GOST Ex and Ex permission certificate (in preparation)														EG5	
Belarus: GGTN certificate														EG9	
Language of documentation															
German														M1	
English														M5	
Western Europe / Scandinavia language package (languages: DE, EN, DA, ES, FR, IT, NL, PT, FI, SV)														MW	
Eastern Europe language package (languages: DE, EL, CS, ET, LV, LT, HU, PL, SK, SL, RO, BG)														ME	
Applications															
Oil- and grease-free for oxygen applications														P1	
Meter name plate															
Stainless steel plate with TAG no.														T0	
Adhesive label with TAG no.														TC	
Float material															
Stainless steel 1.4571 (AISI 316Ti SST)														10) F1	
Scale design															
Directly readable scale														10) SD	
Percentage scale														SP	
Bar graph														SB	
Ambient temperature range															
Extended -40 ... 85 °C (without Ex protection) / -40 ... 60 °C (with Ex protection)														12) R5	
Standard -20 ... 85 °C (without Ex protection) / -20 ... 60 °C (with Ex protection)														10) R6	

9) For Ex version on request.

10) Standard, specified automatically by ABB if no customer specifications have been provided

11) Recommended for indicator with transmitter (4 ... 20 mA) with display

12) Not available for analog indicator with alarm
